

ARC-02

Azure Arc Hybrid Design Workshop

DURATION

2 days

FORMAT

Two days hands-on in the enterprise lab,
in-house or remote · German or English

AUDIENCE

IT leadership and architects who keep Windows Server in their own data center and still want Azure control: policy, updates, Defender, monitoring and license billing via Azure Arc, without moving the workloads.

Certification anchor: No exam focus, content aligned with AZ-800, AZ-801 and AZ-305. The result is a target picture with live lab proof.

OUTCOMES

- ▶ Design the hybrid target picture: Windows Server 2025, Hyper-V or Azure Local below, Azure Arc as the control plane above
- ▶ Calculate Windows Server pay-as-you-go via Arc, Azure Hybrid Benefit and Extended Security Updates as a licensing model
- ▶ Set up Arc-enabled servers, Update Manager, Defender for Cloud, Policy and Monitor live in the lab
- ▶ What stays local, what goes to the cloud: decision rules per workload class

AGENDA

Day 1

Hybrid architectures compared, Arc control plane, licensing models, target picture sketch for your environment

Day 2

Lab: onboard servers, Policy and Update Manager, Defender, monitoring, pay-as-you-go billing. Finalize target picture, roadmap

YOUR TRAINER

Dino Bordonaro

Microsoft MVP for eight consecutive years (award categories Microsoft Azure and Cloud and Datacenter Management), Microsoft Certified Trainer, almost 30 years in IT. Trains Microsoft partners, among others for the ADN distribution. His strength: he connects sales and technology. Pricing models, objections and architecture in a language that decision makers and engineers both understand. More than 800 professionals trained, every concept proven in his own enterprise lab in a TÜV-audited datacenter.

€15,800 plus VAT

Team flat rate for two training days, 4 to 12 participants, in-house or remote. On site plus travel expenses.
