

AUDIT-01

Azure Cost & Dependency Audit

DURATION

1 day

FORMAT

Remote, cost export in advance plus
results session with IT leadership ·
German or English

AUDIENCE

IT leadership and executives who want to know what the
monthly Azure bill really pays for, before anyone decides on
staying or leaving.

Certification anchor: No exam focus. The result is a cost map with a savings list that puts every later decision on numbers.

OUTCOMES

- ▶ See every VM, every storage account and every service with monthly cost and utilization on one map
- ▶ Reserved instances, Azure Hybrid Benefit, rightsizing and orphaned resources as a savings list with euro amounts
- ▶ Expose the dependencies: Entra ID, Microsoft 365, backup, network and licenses that hang on Azure
- ▶ A solid baseline for exit-or-stay, a strategy concept or a contract negotiation

AGENDA

Advance

Cost Management export, Advisor recommendations, resource inventory and license status are delivered and evaluated

Analysis day

Cost map per workload, utilization profile, savings list, dependency X-ray, comparison figures for on-premises operations

Results

Three hours with IT leadership: findings, quick wins, open questions for the next step

YOUR TRAINER

Dino Bordonaro

Microsoft MVP for eight consecutive years (award categories Microsoft Azure and Cloud and Datacenter Management), Microsoft Certified Trainer, almost 30 years in IT. Trains Microsoft partners, among others for the ADN distribution. His strength: he connects sales and technology. Pricing models, objections and architecture in a language that decision makers and engineers both understand. More than 800 professionals trained, every concept proven in his own enterprise lab in a TÜV-audited datacenter.

€7,900

 plus VAT

Fixed price including evaluation of up to 100 VMs and results session, remote. Fully credited when booking STRAT-20.
